

## ACE Migration Trade In

### KEMP Cisco ACE Trade-in Program

Following the announcement of end-of-sale of the Cisco ACE product family, KEMP technologies is offering a range of products and services to customers looking for a well supported, cost effective replacement load balancing solution.

- **The KEMP Advantage**

KEMP load balancers offer a comprehensive set of must-have features at an affordable price without sacrificing performance. With over 26,000 installations worldwide, customers are using KEMP's LoadMaster products to boost performance of their applications, make their network and server infrastructure run more efficiently and shield their business from unwanted intruders.

- **KEMP Service and Support**

All KEMP LoadMasters are backed by a range of worldwide support, configuration and migration services which facilitate deployment and ensure trouble-free operation. KEMP's support team includes Microsoft Exchange, Lync and SharePoint certified professionals, VMware certified professionals and general networking and high availability experts and can assist in all stages of the migration process.

- **The Offer**

KEMP offers a discount when LoadMaster products are purchased as part of a migration away from legacy Cisco ACE products, where a signed Letter Of Destruction confirms that the Cisco products have been decommissioned. Please contact your KEMP sales representative for a quote.

## ACE Migration Trade In
